

SSM 48469 - 2019-2020 Ranger - Front License Plate Bracket Installation

Some 2019-2020 Ranger vehicles equipped with a front license plate bracket noted on the loose items check sheet, may exhibit missing instructions for installation at Pre-delivery. Looking at the front side of the license plate bracket, there is an arrow cast into the middle bar which needs to be pointing up when properly installed. To install, insert the 2 upper brackets (hooks no holes) into thematching slots on the steel bumper, centered and 6" below the Ford emblem in the grill. Press into position until the hooks are snapped into the slots on both sides, press towards the steel bumper until the lower brackets line up with holes on the bottom of the bumper. Install the screws provided to secure the bracket, torque to 4.8 Nm (43 lbâ€“in).
